PROJECTS

Maitri Sakhi App (03/2024 - Present)

- Developed an Android application providing **maternal knowledge to pregnant women** in rural areas for an NGO.
- Used **React** for the admin panel, **React Native** for **Android** development, **Firebase**, and **Node.js**.
- **Architected** the app, **led the project**, and created the **admin panel dashboard** using React.js.

Corpstage Platform (01/2023 - 02/2024)

- Worked on leading sustainability partner in Singapore, focused on **ESG assessments**, carbon analysis, and workshops, offering a **SAAS**-based platform for sustainability management.
- Used React for the web app, ROR on backend, AWS for DBMS.
- Contributed in creating **feed section**, various **forms** and **user profile section**.

21K School Web LMS (06/2022 - 01/2023)

- Was part of the team providing a full range of features for **online education**, including **student** and **teacher management**, **assessments**, and performance tracking.
- Implemented with React for the front-end, Ruby on Rails for back-end functionalities, and AWS for cloud hosting and data storage.
- Designed and developed the profile section for user accounts, the test section for **online assessments**, the **dashboard** for **administrative** and **analytical** functions, and a recruitment system for **managing school admissions and enrollments**.
